This is responsive to the amendment filed on 12/31/2007.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 9-10, 12-13, 15-18 and 20, drawn to a system for monitoring of network computer object and accessing a storage device to store monitored data, classified in class 709, subclass 224.
- II. Claims 11 and 14, drawn to a system for monitoring of network computer object and communicating monitored data to a management computer, classified in class 709, subclass 224.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility because the system for communicating monitored data to a management computer can be used in a system where the operating data is *not* stored in a storage device *when* event indicates an occurrence of trouble or a degradation in performance of the monitoring object. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. The search for the invention of Group I would require considering class 711, subclass 100 (Storage Accessing and Control), while the search for the invention of Group II would not.

Applicant is advised that the reply to this requirement to be complete **must include an election** of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

A shortened statutory period for response to this action is set to expire **one month (not less than 30 days)** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
